TO WHOM IT MAY CONCERN – LETTER OF RECOMMENDATION

This letter serves to commend Conrem Energy for work undertaken for our organization.

Conrem Energy has designed and installed four large industrial solar water heating systems for us and have developed a system allowing hot water to be delivered at specific times, whilst keeping the hot supply pipes fully charged with water. This design, along with the solar installation, has provided very cost effective hot water systems with minimal operating costs.

All time-lines have been kept and no delays were experienced on our sites and for this we are grateful.

Conrem Energy are currently designing photovoltaic systems for our buildings and we look forward to the same level of competency with these projects, along with good electrical savings.

Yours faithfully

S. Balakisten

Director: GAP Developments
